Khang Truong Giang

khangtg.hust.it@gmail.com | +82-10-9785-6550 | South Korea
truongkhang.github.io | github.com/TruongKhang | Google Scholar

My goal is to build autonomous systems that reconstruct and understand the 3D world from 2D images.

Education

Korea Advanced Institute of Science and Technology (KAIST) *Daejeon, South Korea*
Ph.D. in Computer Science 09/2021 – 08/2024
Advisors: Prof. Sungho Jo, Prof. Soohwan Song. Research Interests: **3D Reconstruction**

Korea Advanced Institute of Science and Technology (KAIST) *Daejeon, South Korea*
M.S. in Computer Science 09/2019 – 08/2021

Hanoi University of Science and Technology (HUST) *Hanoi, Vietnam*
B.Sc. in Computer Science (School of ICT Talent Program) 09/2013 – 08/2018
GPA: 3.62 / 4.0 | Graduation with Honors (**Excellent Degree**).

Professional Experience

Visionary *South Korea*
Senior Research Engineer 08/2026 – Present

- Developed an evaluation engine for perception and end-to-end planning models to identify failure cases and guide model improvements.
- Built a simulation environment using Alpasim and NuRec, with pipelines to generate synthetic training data for critical long-tail driving scenarios.

42dot (Global Software Center of Hyundai Motor Group) *South Korea*
AI Model Engineer II 07/2024 – 08/2026

- Contributed to multi-task learning architecture development; designed and developed models for long-range object detection up to **150 m**.
- Led projects on 3D traffic light detection (up to **90 m**) and 2D traffic sign detection, from annotation design through model development, training, and release.
- Designed manual annotation and pseudo-labeling workflows for 3D traffic lights, and the annotation process for 2D traffic signs.
- Developed a diffusion policy for trajectory prediction, extending perception expertise to learned action generation for autonomous systems.

Neuro-Machine Augmented Intelligence Lab, KAIST *South Korea*
Graduate Researcher 09/2019 – 06/2024

- Conducted research in core 3D reconstruction areas, including high-precision feature matching, visual localization, and multi-view depth estimation.
- Authored and maintained research repositories on GitHub:
  - **CDS-MVSNet:** An accurate, efficient learning-based multi-view stereo network.
  - **TopicFM / TopicFM+:** A highly robust, efficient, and interpretable image matching model.
  - **DeViLoc:** A semi-dense visual localization system designed for robust spatial awareness.
- Published research at CVPR, AAAI, ICLR, and IEEE TIP.

Viettel High Technology Industries Corporation *Hanoi, Vietnam*
Software Engineer 09/2018 – 06/2019

- Built a robust machine learning pipeline to analyze and predict user activity levels across the telecommunications network.
- Containerized and deployed the models as production Web APIs using Flask.

Honors and Awards

- Peer Recognition, 42dot (Sponsored Jeju Workcation) 2024
- Outstanding Reviewer Award, CVPR 2024
- Silver Medal (Top 9%), Kaggle Image Matching Challenge 2023
- Hyundai Motor Chung Mong-Koo Scholarship for outstanding PhD students 2021 – 2024
- Full Graduate Scholarship, KAIST Master's Program 2019 – 2021
- Excellence Academic Scholarship, HUST 2018
- Lotte Scholarship for outstanding university students 2017
- Certificate of Excellence (Ranked 1st in academic cohort), HUST 2014
- Third Prize, Vietnam Mathematical Olympiad (VMO) for High School Students 2013

Academic Activities & Service

- **Conference Reviewer:** actively participate in top-tier conferences (CVPR, ICCV, AAAI, NeurIPS)
- **Journal Reviewer:** IEEE TIP (2024), IEEE TCSVT (2023), IEEE RA-L (2023), IEEE T-ASE (2024)
- **Mentorship:** Academic Mentor advising two undergraduate and master's students in research initiatives.

Technical Skills

Python, PyTorch, PyTorch Lightning, C/C++, Linux, Git.
